

### **What they're saying...**

Munich's *Süddeutsche Zeitung* recently called them „the best Rock'n'Roll band in the World“ while another home town paper reported on how their music grabs audiences by the legs and rocks them 'til the whole body shakes. The *Abendzeitung* tells the story of how they put smiles on many a tough guys' face when they played at Munich's Stadelheim prison. *Playboy Magazine* commented on their album „Welcome to the Club“ by calling it the perfect party album and Belgium's *Billy Bop Magazine* had this to say: „this band opens up possibilities for new and old songs far beyond the usual fishing well and transform them in something totally new... an ability that surely must be nourished!“
